1 Executive summary

This report provides description of the project web site. The web site is running from month 1, unfortunately the server where it was allocated was attached and all the information deleted. New security measurements have been applied in order to avoid further vulnerabilities. The web page was down for almost 6 weeks and needed to be again implemented and populated.

2 Introduction

The consortium within the WP6 Exploitation, dissemination and standardisation activities aims at creating a common tool to deliver information related to the Project's activities and achievements that will ultimately increase the awareness of the WITH-ME project. External communication and diffusion are key activities for the dissemination success. They will promote and spread the knowledge generated by the consortium to general public and specialized audience, such a stakeholders, caregivers or healthcare professionals.

The development of the WITH-ME's web site is the main source of information from the WITH-ME project. Moreover, it has the goal to also support and optimize the work among the partners and also to raise awareness and disseminate the project at international level.

The web site will be provided by wide range of information and is mainly and conceptually divided in two areas:

a) *The public area*: It contains general information about the project objectives, consortium composition and public deliverables.

b) *The private area*: It is restricted for public access and is only allowed to WITH-ME partners. This area is dedicated to internal communication, file management, scientific documentation exchange and could also serve for raw data and algorithms repository. NOTE: This section is still under construction and the partners are deciding its final content; this is the reason why in this document we have not detailed the exact content of it at any of the document's sections.

The WITH-ME web site will be continuously under development and refinement during the project lifetime. To find out more about the features of the WITH-ME web site, we recommend visiting the web site: http://www.with-me-project.eu.

2.1 Purpose, context and scope of this deliverable

The purpose of this deliverable is to detail de project web page ant its different section. The document will became obsolete soon, as the web page evolve with all its content. The web site will be continuously update across the life of the project and beyond.

3 The WITH-ME Logo

The WITH-ME logo is based on simplicity without renounce to evoke the technological significance of the project as well the objectives and original design that resemble distinctively the WITH-ME project.

Figure 1. WITH-ME Logo.

4 The WITH-ME Web Site

This chapter gives a description at a glance of the different parts of the WITH-ME web site.

4.1 Project Description

The home page of the WITH-ME web site gives an overview on the relevance and impact of the project and explains which the goals of the project are.

Figure 2. WITH-ME Home page.

4.2 Project Objectives

The home page of the WITH-ME project provides us with a summary of the project's objectives.

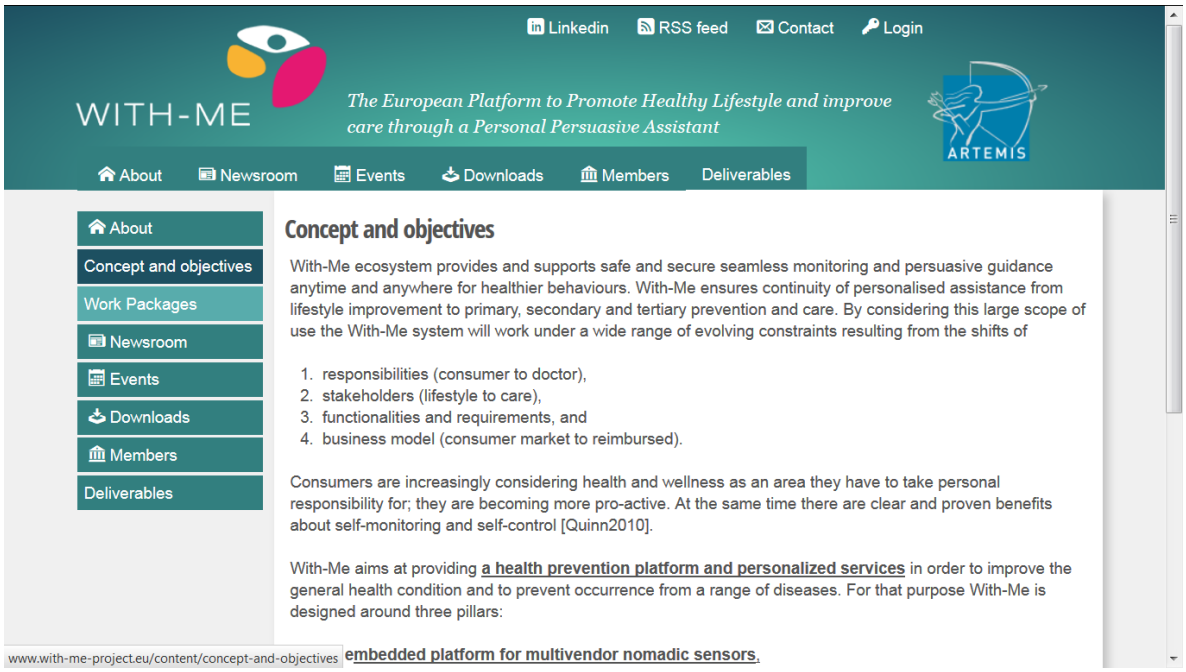

Figure 3. WITH-ME project's objective.

4.3 The Consortium

The WITH-ME consortium partners are listed with a general description about their background, their specialization and what are their research interests. All of them have thorough medical and technical expertise. In this section presents also WITH-ME's contact persons. Contacts are listed with a link that provides full contact information.

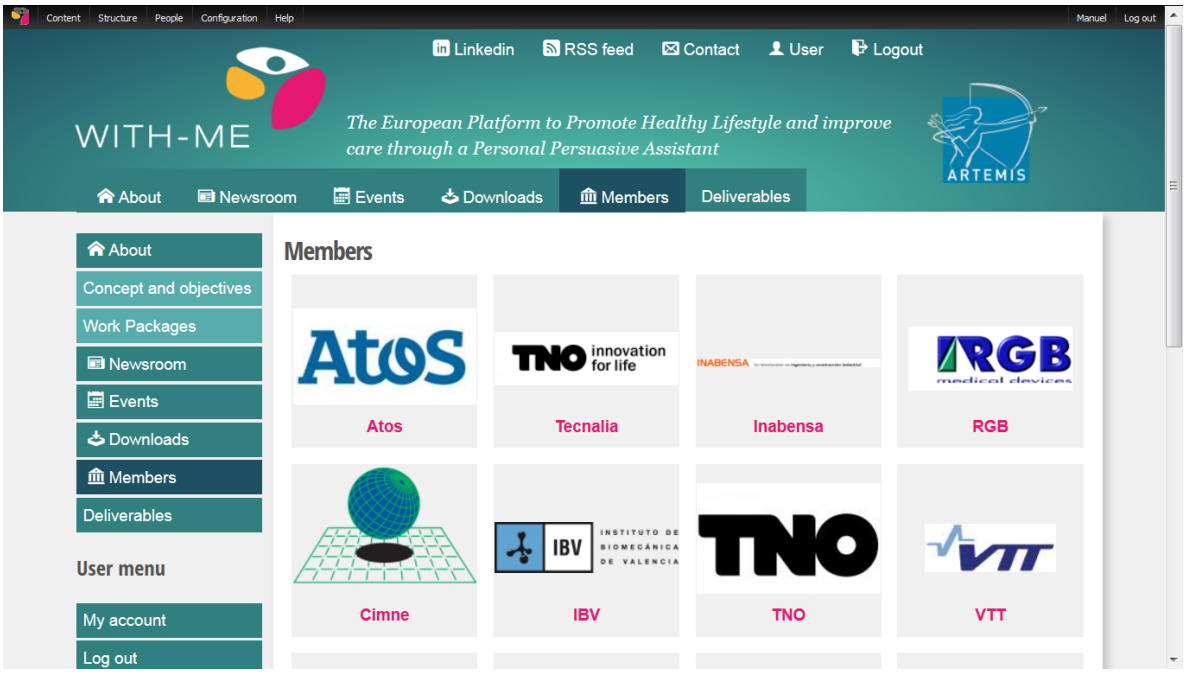

Figure 4. WITH-ME Partners section.

4.4 Events and Newsroom

This section offers information to the general public and to the WITH-ME consortium about oncoming events and news both from the WITH-ME project itself, as well as topics related to physiological signal analysis such as the latest findings in algorithm research, WITH-ME objectives related developed, conferences and symposia.

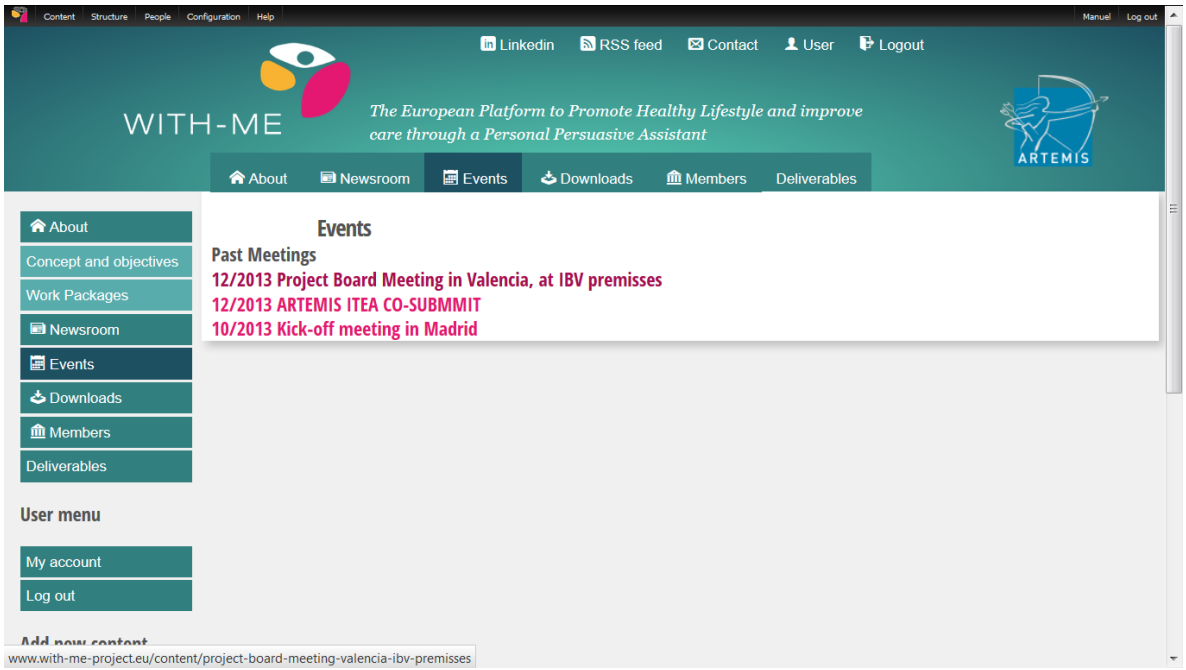

Figure 7. WITH-ME list of events. By clicking in one of the link a new page will be opened with further information

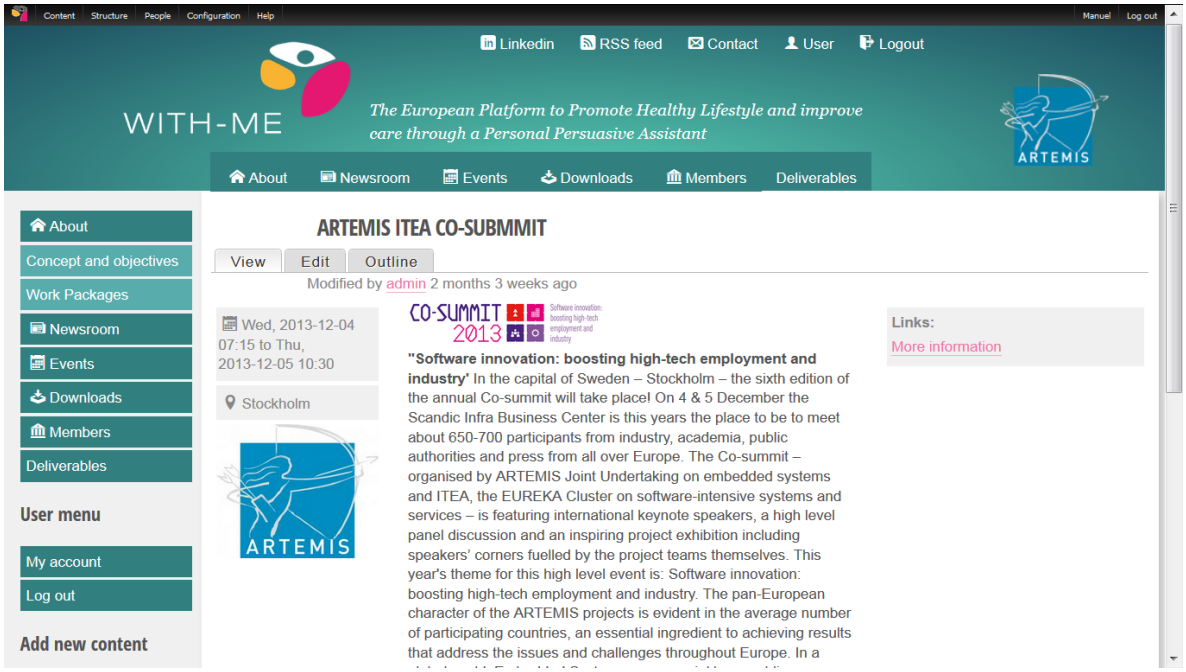

Figure 8. Detailed information about the event is provide in a separate page.

4.5 Downloads

This area has been divided into three main sections namely, Brochures & Posters, Public Project documents and Publications (further described below).

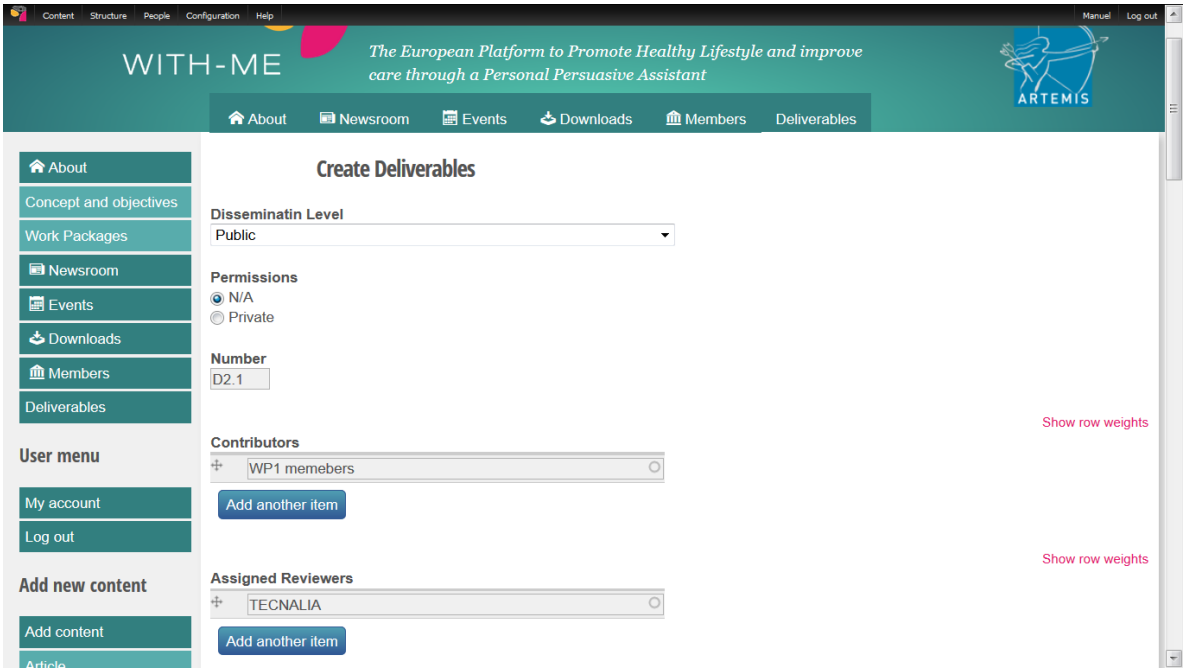

Figure 7 . WITH-ME Upload deliverable section.

4.6 Public Project Documents

This section provides information about all the public deliverables of the project. Deliverables could only be downloaded once they have passed the review process..

4.7 Publications

Publications produced by the WITH-ME consortium will be downloadable here as soon as published. If the publications are subject to third person rights, i.e. some scientific magazines, a proper link to the official site for downloading will be provided.
